

✦ VOLUNTEER OPERATIONS PLATFORM

Next-Generation Volunteer Coordination

A centralized, real-time ecosystem that connects organizations and volunteers — from shift planning to live attendance tracking.

 Next.js 16

 PWA Ready

 AI Matching

 Real-Time

THE PROBLEM

Fragmented **Coordination** Slows Everything Down

Organizations struggle with disjointed tools, manual processes, and zero visibility into their volunteer operations.

Manual Assignment

Assigning volunteers to shifts by spreadsheet is error-prone and doesn't consider skills or availability.

No Real-Time Visibility

Supervisors have no live view of who's checked in, who's late, or what roles remain unfilled during an event.

Siloed Systems

Scheduling, communications, and reporting live in separate tools with no unified source of truth.

Chaotic Communication

Last-minute changes require frantic calls and texts with no formal escalation path.

✦ THE SOLUTION

One Unified Platform for Everything

Tribute brings together scheduling, attendance, AI matching, and supervisor tools under a single, intuitive experience.

Centralized Scheduling

Browse, filter, and sign up for shifts with calendar integration and real-time seat availability.

Live Attendance Tracking

QR-code check-in and supervisor dashboards give instant visibility across all active shifts.

AI-Powered Auto-Match

Automatically assign the right volunteers to the right roles based on certified skills and availability.

Role-Based Access

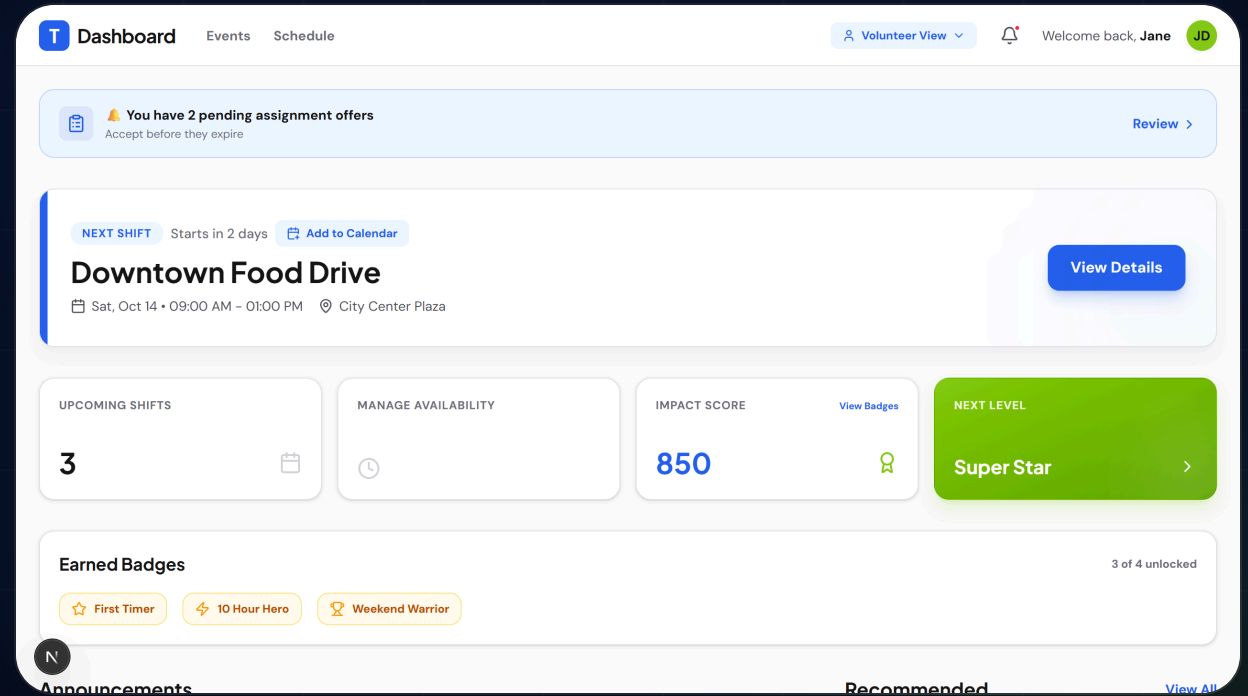

Tailored views for Admins, Supervisors, and Volunteers — everyone sees exactly what they need.

FEATURE 01

Volunteer Dashboard

A personalized home base where volunteers see their upcoming shifts, hours logged, and quick actions — all at a glance.

- Upcoming shift reminders & countdowns
- Cumulative hours tracking
- One-tap check-in access
- Notification center for new opportunities

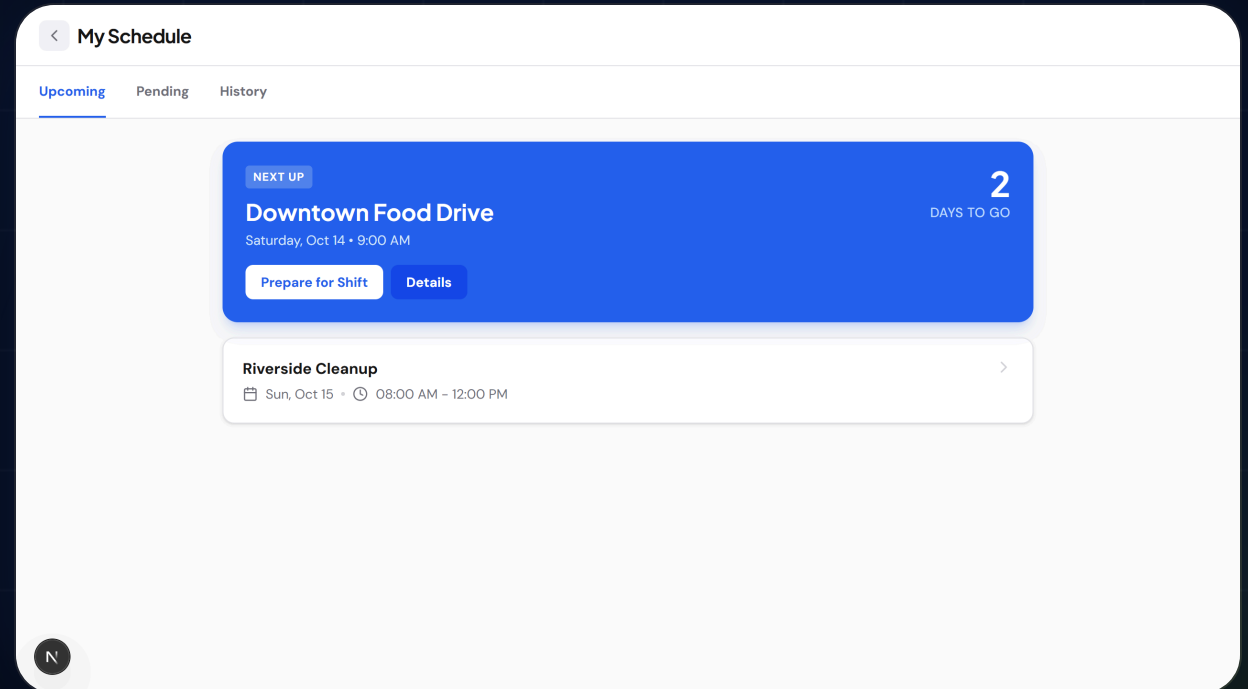

FEATURE 02

Shift Planning & Discovery

Volunteers browse available shifts by date, category, location, and required role — and sign up in seconds.

- Interactive calendar with event dots
- Filter by skill, role & location
- Add to calendar (iCal & Google)
- Real-time seat availability

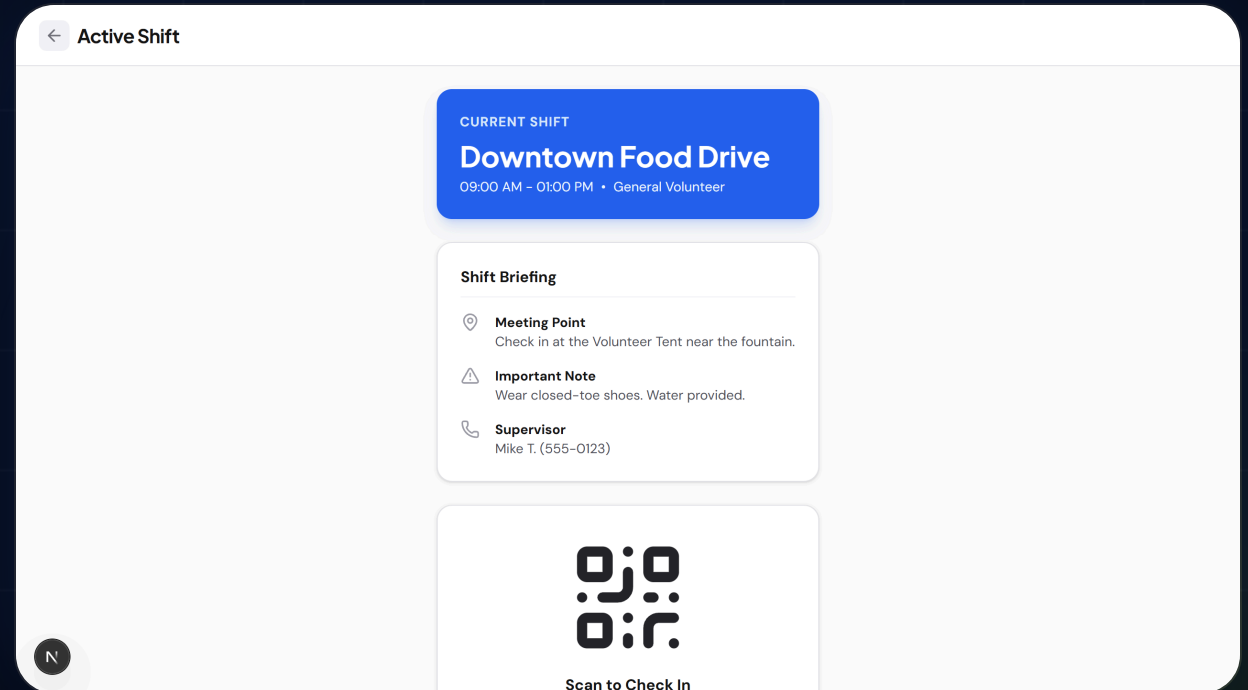

FEATURE 03

Active Shift Tracking

During a live event, volunteers and supervisors have real-time tools to manage attendance, log incidents, and track assets.

- Live check-in / check-out
- Incident reporting workflow
- Asset check-out management
- Shift close-out & summary

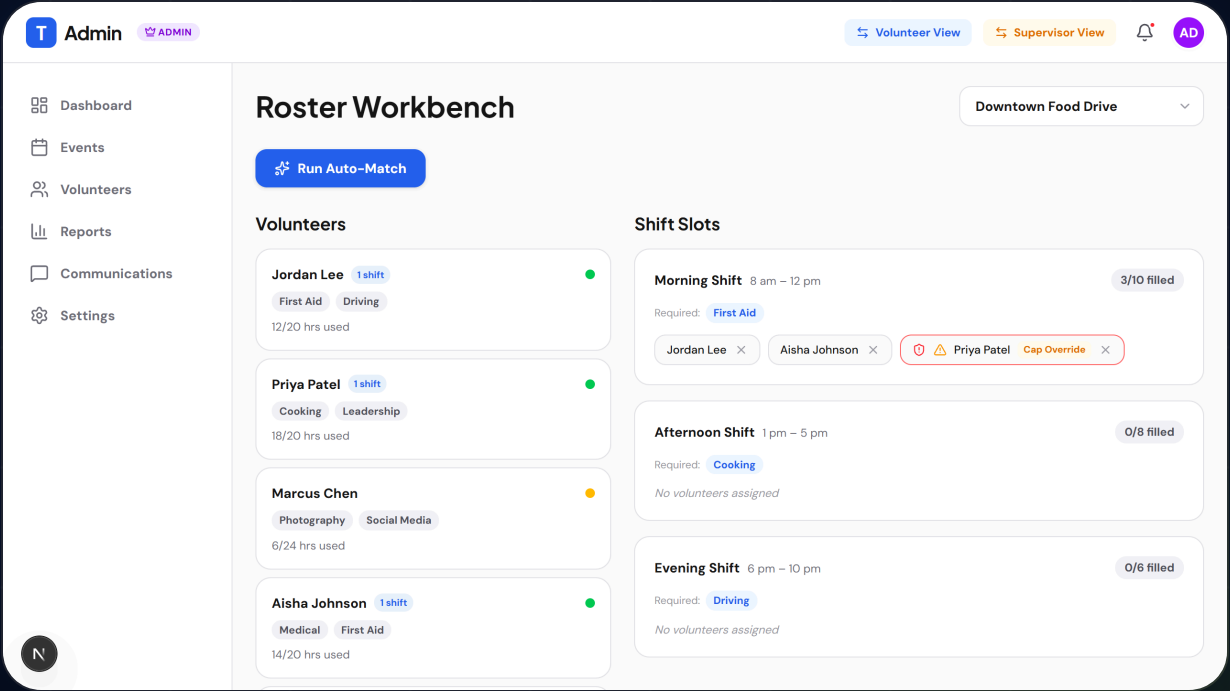

FEATURE 04

AI Auto-Match

Admins trigger smart auto-assignment that scores every volunteer against required shift skills, maximizing coverage in one click.

- Skill-based scoring algorithm
- Respects volunteer hour caps
- Manual override supported
- Waitlist management

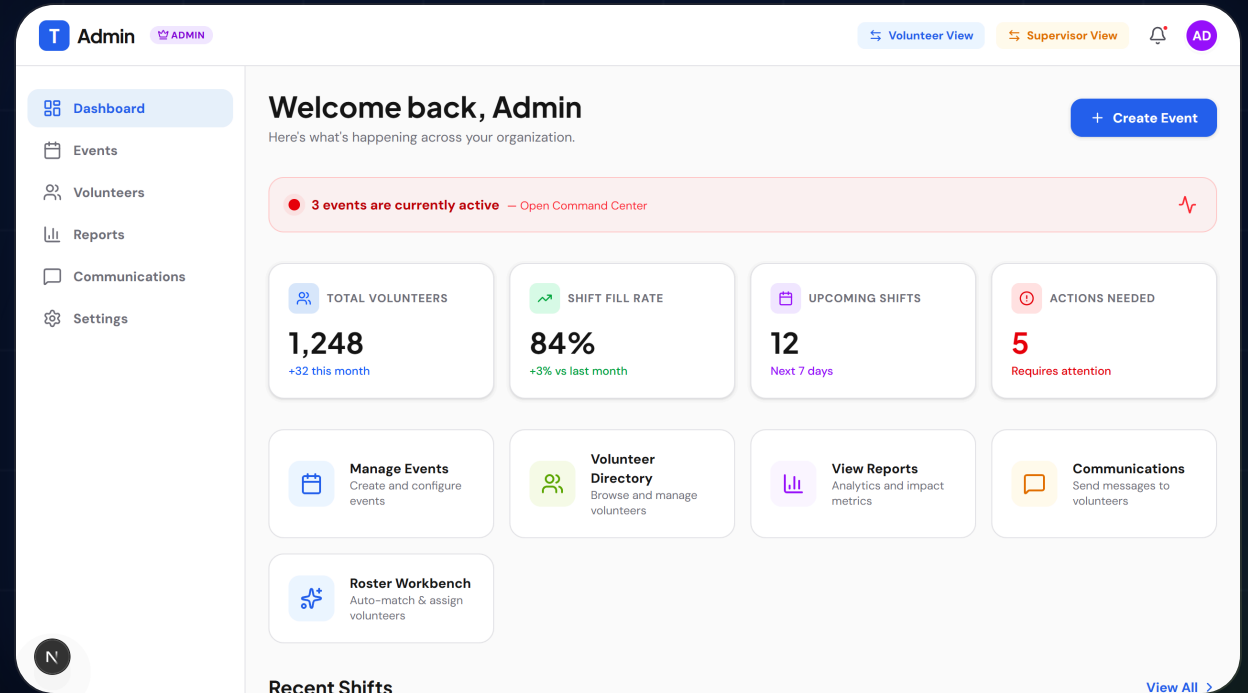

FEATURE 05

Platform Administration

A full admin suite for creating events, managing rosters, sending communications, and viewing analytics across all activity.

- Event creation with skill tags
- Volunteer roster management
- Multi-channel communications
- Platform-wide analytics

✦ BUILT TO SCALE

Modern Technology Stack

Engineered for performance, accessibility, and a seamless experience on any device.

Next.js 16 App Router

Server-first rendering with dynamic routing and edge-ready deployment

Progressive Web App

Installable on iOS & Android with offline caching via Service Workers

Tailwind CSS v4

Utility-first design system with consistent, responsive layouts

TypeScript

Type-safe codebase for reliability, maintainability, and DX

Ready to Transform Volunteer Management?

Built for organizations that believe great volunteers deserve a great experience.
